Nazaire Shabazz

FULL STACK WEB DEVELOPER

nshabazz.com | fullstack@nshabazz.com | (585) 530-9670

Highly adaptive web developer with 8+ years of professional experience. Increased performance of 3D web application by 12%, debugged product code with 100+ errors down to zero, and single-handedly developed a full stack SaaS product that saves the client 300+ hours per year. Looking for a role at mid-level or above.

Experience

Lead Web Developer, Dice Versa, Jun 2025 - Dec 2025

❖ Led a team of three to create a fully featured website for a cafe client. I worked with the designer in Figma, then began creating the components with my co-developer in Svelte with Vite. For hosting, we used a Github Actions CICD which connects to Firebase. In the backend, Realtime Database and Firebase Storage are used as well. Pride point: Besides SEO, the website includes admin editing capabilities, allowing the client to make changes on the fly.

Full Stack Developer, Cigna Health Group, Oct 2023 - Jun 2025

❖ Promoted to a new role within Cigna. This time I joined a more backend-heavy team, though I still performed frontend work. Along with adapting Figma files with React and styling with CSS, I would adjust the code of our Lambda functions using Node.js, adjust Terraform yaml, and optimize SQL queries on tables with millions of rows. Pride point: optimized a SQL query in our build, reducing a 7 hour CICD pipeline to just 40 minutes.

Full Stack Developer, Cigna Health Group, Feb 2022 - July 2023

❖ Joined a team using TypeScript React and AWS to complete an existing B2B health insurance web app. I was given permission to take on a supportive role, so I improved DX by fixing hundreds of React / TS errors, and creating Jest tests for our components. Spearheaded documentation efforts; creating countless JIRA tasks, Confluence pages, and meeting notes. Onboarded new hires, and maintained cross-functional communications to inspire a productive, peaceful development environment. This was in addition to adding components from Figma in the frontend, and styling with CSS / SASS.

Solo Developer, NYNY Dueling Pianos, Jan 2020 - Jan 2022

❖ Contracted as solo developer. Created a fully featured CRM system. The frontend is vanilla JavaScript and HTML5, with AWS Lambda (written in Node.js) / API Gateway and DynamoDB as the backend. From third-party integrations to document generation, this was a 0 to 1 app. I've also added websocket integration, allowing him and his assistant(s) to work on the same event at the same time. Pride point: client estimates they've saved at least 300 hours per year, thanks to my app.

Full Stack Engineer, PWC (EagleDream Technologies), Aug 2018 - Nov 2020

❖ Worked in a small team to develop a 3D interface for a telecom client, allowing them to measure and debug satellite towers. Developed in Angular with WebGL (three.js), using Jasmine as the testing unit. Used AWS S3, Cognito, Lambda (with Node.js), and DynamoDB on the backend to store files, sync data, and ensure only authorized users could take those actions. Pride point: optimized graphical math and code, giving us a 12% boost to framerate. Started as an intern, promoted to fulltime within half a year.

Education

Rochester Institute of Technology

- ❖ 2020, Bachelor of Science, Computer and Information Technologies

Other Projects

[Name Under NDA] 2025

- ❖ (still ongoing) Developing a game with TypeScript, React Native, and three.js. Using AWS S3 and CodePipeline for CICD, Cognito for syncing users, DynamoDB for leaderboards data, and Lambda / API Gateway for the in-between transactions.

Upstate Granite Marble 2024

- ❖ Created an error and event analytics app with React for a construction client. I programmed and hosted it on their private server, so cloud outages won't affect it. Data is kept in Postgres tables, and D3.js is used to display analytic results

Other Stats

Tech Skills: CSS / SASS (flexbox, grid, animations), CICD, Vite, Webpack, ADA Compliance

Soft Skills: Problem Solving, Mathematics, UX, Teamwork, Empathy, Communication

Languages: English (Fluent / Native), Spanish (Intermediate), Mandarin (Beginner / Learning)
